DETAILED ACTION

Specification

The abstract of the disclosure is objected to because the bottom of the abstract contains the following: "G:YDMKTATFILEVS834hIZ-OO6tAPP". Correction is required.

See MPEP § 608.01(b).

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1, 2, 4-7, 9, and 10 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-8 of copending Application No. 10/154,748. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Art Unit: 3663

It should be noted that "a member of a fleet" recited in the application 10/154,748 would be included an aircraft as a member of a fleet. "A system for recording and analyzing reliability data during a dynamically-planned maintenance check" as stated in 10/154,748 is also meant "A system for recording and analyzing reliability data for an aircraft during a dynamically-planned maintenance check".

Allowable Subject Matter

Claims 3 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
